Satyam gets CMMI Level 5 for 2 units

SATYAM Computer Services has announced that two of its units, Automotive Business Unit and the Microsoft Solutions Group, have been assessed at Level 5 under Capability Maturity Model Integrated (CMMI), instituted by the Software Engineering Institute (SEI) of Carnegie Mellon University. The assessment has been done by Sitara Technologies, a leading assessment firm. The CMMI framework is the latest release from SEI and integrates the four bodies of knowledge, namely systems engineering, software engineering, integrated product and process development, and supplier sourcing. It enables an organisation to set process improvement objectives and priorities and continuously raise its levels of quality, says a Satyam press release.

Two Satyam units assessed to CMMI

Our Bureau
Hyderabad, Dec. 22

SATYAM Computer Services Ltd. has announced that two of its units — Automotive Business Unit and the Microsoft Solutions Group — have been assessed at Level 5 under Capability Maturity Model Integrated (CMMI), instituted by the Software Engineering Institute (SEI), Carnegie Mellon University, USA.

The Senior Vice President for Quality, Satyam, Mr C.R. Nagaraj, in a statement said, "Achieving CMMI Level5 is an important milestone in Satyam's journey towards excellence. CMMI backed with our initiatives of ORBIT 5 & Six Sigma will continuously raise the

Quality bar and deliver better value to our customers."

The assessment is part of Satyam's efforts in improving the processes across the entire organisation.

The lead appraiser of SITARA Technologies, Mr Raghav S. Nandyal, said, "This results in optimising level of maturity on the CMMI and serves as an indication of both the richness of management systems and vigour of engineering practices."

Satyam has embarked on an internal initiative of ORBIT 5 (Organisational and Business Transformation), which enables value creation across the organisation by benchmarking the various processes and achieving Level 5 performances.
